

Heirloom Valentine Cap

Knit to within last 4 rows, place on plastic small circular needle

Edit the design on sewing machine screen so that it will sew out on the bottom of the hoop. That leaves enough stabilizer to do one more. Use cutaway or washaway stabilizer in hoop, spray with 505 or other basting spray

Smooth knitted area on sprayed stabilizer. Check to see if design placement is correct. Top with Solvey wash-a-way stabilizer.

Stitch design carefully, cutting jump stitches as they occur. Cut completed design from hooped stabilizer, leaving the rest of the stabilizer in the hoop to embroidery another design on second cap.

Valentine cap fits 18" dolls such as American Girl doll or premature babies. If donating to hospital, wash in perfume free detergent first.
